CANMAG PERMANENT MAGNET LIFTERS

Highlights:

- *The safety aspects have been taken care of by providing a 3 to 1 safety factor and also a specially designed handle with safety lock. The magnets are guaranteed to retain original strength indefinitely under normal use.*
- *One turn of the lever switches the magnet ON or OFF and makes it ideal for handling large heavy material easily by one operator.*
- *Seven models offer a wide choice of lifting capacities as also the special contoured or V-Shaped pole profiles allows the same magnet to be used for lifting round bars or pipes and work pieces.*
